And God said, Let there be lights in the firmament of the heaven to divide the day from the night; and let them be for signs, and for appointed times, and for days and years. (Gen 1:14)

# New Moon Observation

## 8 September 2021

# DEVORAH'S DATE TREE

The most reliable and respected New Moon and Aviv Reports from the Land of Israel

Dear Friends,

The New Moon was sighted from Israel this evening, Wednesday, 8 September 2021!

- \* From Jerusalem at 7:06pm by Devorah Gordon, followed by Gil Ashendorf.
- \* From Tiberias at 6:59pm by Dennis Chkolnik, Maureen Chkolnik, and Or Rorriguez.
- \* From Nahariya at 7:12pm by Jonathan Haber.

This means that sunset on September 8, 2021 marks the beginning of the new month. Be sure to keep track of what number month this is, based on when you started the new year.

I know some of you expressed concern because I didn't look for the New Moon last night (September 7, 2021). I hope you understand that if there was even the slightest possibility that the New Moon could have been visible last night, of course I would have been out there. However, there was no point in going out, because the stats were so low last night, that it was literally impossible to see the New Moon. In fact, I can share with you that three of our observers looked last night (one in the North and two in the South), but of course they did NOT

see the New Moon.

The photo at the top of this report was taken from our observation point in Jerusalem this evening.

On behalf of all of us who rely on these observations, we wish to thank everyone in Israel who looked for the new moon this evening and sent in their observations in a timely manner. We are also extremely grateful to those of you who have stepped up and are supporting our efforts from afar, your support helps us be able to collect the observations and share these reports in a timely fashion.

## 2021 HOLIDAY DATES
