And God said, Let there be lights in the firmament of the heaven to divide the day from the night; and let them be for signs, and for appointed times, and for days and years. (Gen 1:14)

New Moon Observation

3 January 2022

DEVORAH'S DATE TREE

The most reliable and respected New Moon and Barley Inspection reports from Israel

Dear <<First Name>>

At the time of this writing, we are not aware of anyone successfully sighted the new moon with their naked eye from Israel this evening, 3 January 2022. As this was the end of the 29th day of the month, that means that tomorrow evening will be the beginning of the new month by default. The photo at the top of this report was taken from our observation point in Jerusalem this evening.

On behalf of all of us who rely on these observations, we wish to thank everyone who looked for the new moon from Israel this evening and everyone supporting our efforts from afar. Thanks to our combined efforts, we are able to provide reliable New Moon observations from Israel and restore the Biblical Calendar!

As in years past, we are planning on carrying out the necessary Barley Field

Inspections towards the end of the Biblical Year, with our first inspection currently scheduled for just before the New Moon of March 3, 2022. We would like to be able to inspect the barley from the North of the country down to the South and to be able to go out as many times as needed to ensure we are starting the year at the proper time. As you can imagine this will be a costly endeavor, but I think you would agree that it's an important one. Please pray for our safety and consider [supporting](#) efforts.
