And God said, Let there be lights in the firmament of the heaven to divide the day from the night; and let them be for signs, and for appointed times, and for days and years. (Gen 1:14)

The most reliable and respected New Moon and Barley Inspection reports from Israel

25+ Years Experience
New Moon Observers Across Israel
Thorough Barley Inspections

Dear Friends,

The New Moon has been sighted from Israel this evening, **Friday, 21 April 2023**, thus marking the beginning of the month.

The New Moon was sighted from:

*From Jerusalem at 7:44pm by Cristian Pricop, followed by Devorah Gordon and Gil Ashendorf

The photo at the top of this report was taken from our observation point in Jerusalem.

As days in the Biblical Calendar are from sunset to sunset, Rosh Chodesh (the first day of the month), begins when the New Moon has been sighted and continues until sunset the following day. Rosh Chodesh a celebratory day (Num 10:10; Hosea 2:11), which was traditionally commemorated by blowing the shofar (Num 10:10; Psalm 81:4[3]), having a festive meal (1 Samuel 20:5, 24), and worshiping at the Beit HaMikdash (Temple) (Isaiah 66:23;

Ezekiel 46:3) with a special sacrifice (Num 28:11-15; 2Chronicles 2:3; Ezra 3:4-5, Ezekiel 45:17, Ezekiel 46:6).

Are you planning on inspecting the fields again?

Seeing how when we inspected the fields on the 7th and 8th days of the last Hebrew month, a lot of the fields were still not Aviv, and those in the Jordan Valley (Joshua 5:10-12) and the Beit Shean regions, and we had much heavy rain, some of you asked whether we could organize another inspection next week. Although it's very expensive every time we go out, we are going to try to make this happen, and hope to be able to send you that report on May 1, 2023 (the 10th day of the Hebrew month). Please pray for our safety and guidance and [support](#) this upcoming Barley Inspection.

2023

1st MONTH ^{potential} HOLIDAY DATES

according to the Biblical Calendar

New Moon Observation March 22/23, 2023	Scenario #1 <i>If New Moon sighted on 22-March-2023</i>	Scenario #2 <i>If New Moon sighted on 23-March-2023</i>
