Update: We have two witnesses from Jerusalem.
New moon sighting September 12, 2026

Who saw it how?
Tirzah and Josa Rapuano, two experienced observers, saw the new moon with the naked eye through a cloud and both of them subsequently confirmed the sighting with binoculars under the cloud afterwards.
Where: Gilo, Jerusalem
Time: 19:15

I have a question if in the past our people didn't used to have binoculars to confirm the rosh jodesh. Why nowadays those are precise to declare the rosh jodesh if we as them still having having eyes to confirm it?

Are these two witnesses related to each other? Can two related people serve as witnesses together?
